## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 4/17/06 and 1/6/05, respectively, have been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 3 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukuda (US 5,125,217) in view of Ball (US 5,890,644).

Fukuda discloses a packaging machine comprising a cylindrical chute with means for bending a film S into a tubular form 103; a heater unit 55 for longitudinally sealing overlapping side edges (figure 1); heater driver unit 45, which moves heater unit between retracted and operating positions (figure 8); and an air cylinder 78 for controlling the compressive force of the heater unit 55 and film S. The air pressure is

regulated at a specified level. Universal joint 68 allows for a further retracted position of the heater unit 55 from film S; see column 7, lines 10-15.

Fukuda does not disclose heater driver as another cylinder, but discloses "different combinations of motion-communicating and torque-communicating means can be substituted." (column 8, lines 34-36). Ball teaches a clamping device with movable arm 24 that can be actuated by well known alternate means including an air cylinder, lead screw, or motor etc.; see column 6, lines 25+.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to substitute an additional air cylinder in place of screw axis 59 for assisting in the movement of heater 55.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R. Harmon whose telephone number is (571) 272-4461. The examiner can normally be reached on Monday-Friday from 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on (571) 272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
